Completely Customized to Meet Your Needs

Whether you are remodeling an office or refurbishing a laboratory, our Mill Shop can create the cabinetry, furniture, and building elements to complete your project. You could spend hours searching through catalogs for a piece of

mass-manufactured furniture to fit your needs or you can simply have a piece designed by our Mill Shop.

Competitively Priced

Don't let the concept of customized furniture conjure thoughts of exorbitant prices. Our prices are at least a third less than comparable custom shops, and we are always willing to provide you with a free estimate for any size project.

Expertly Crafted

Our experienced Mill Shop staff takes great pride in the pieces that they build. From age-old woodworking techniques to the latest in equipment, our shop produces quality furniture that is built to last a lifetime.

Made with Quality Materials

Each piece is designed and crafted with the highest quality materials. Fine woods including oak, cherry, and birch as well as laminates, water proofing materials, sealants, and finishes are used to enhance and protect your project.

You're Only Limited by Your Imagination...
